

Idle\_state::update

Motor\_control\_state  
::update

Display::update

```
graph LR; A[Idle_state::update] --> C[Display::update]; B[Motor_control_state::update] --> C;
```

The diagram illustrates a data flow or dependency. On the left, there are two white rectangular boxes with black borders. The top box contains the text 'Idle\_state::update' and the bottom box contains 'Motor\_control\_state' followed by '::update' on a new line. On the right, there is a gray rectangular box with a black border containing the text 'Display::update'. Two blue arrows originate from the right side of the two white boxes and point towards the left side of the gray box, indicating that both state update functions feed into or trigger the display update function.
